DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10 and 14-23, drawn to a pseudo-live performance generator, classified in class 709, subclass 246.
 - II. Claims 11-13 and 24, drawn to a performance transmitter, classified in class 709, subclass 246.
2. Inventions I. Performance generator and II. Performance transmitter are distinct inventions and are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the performance transmitter in no way affects invention I. ability to generate a performance. The subcombination has separate utility such as the transmitter can be used to transmit a performance or any other information over the network.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2141

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. A telephone call was made and message left to Benjamin Lee on September 2, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
